

How long will the silver electrodes last?

The original silver electrodes should last almost indefinitely - even with extensive silver generation. To preserve their longevity, always remember that it is a vital protocol that the electrodes be polished with the (provided) 100% copper scouring pad to ensure that the electrodes are lightly polished rather than grinded down with extremely abrasive "*scotch-brite*" pot scrubbers.

Copper carries a very similar *hardness* to our special silver electrodes and makes an optimal *surface-to-surface* choice for cleaning the pure silver electrodes without excessive wear.

Our competitors suggest using "*scotch-brite*" scrubbers as the cleaning medium and this is the leading reason for requiring very frequent replacement of their silver electrodes. These scrubbers are *extremely* abrasive and *unnecessarily* remove considerable amounts of silver from the electrodes with each cleaning.

Keep in mind that there are two versions (or generations) of **The SilverLungs Generator** that require different electrodes if you are ordering replacements. The "*Gen 2*" version features a (blue) indicator light when the rear switch is set to the "off" position, while the "*Gen 1*" does not display a "blue" indicator light when set to the "off" position.

The current generation featured on our site is the "*Gen 2*" version of **The SilverLungs Generator** and requires the (7 gauge) silver electrodes and (not) the original 10 gauge silver electrodes.

So of course, if you are ordering replacement electrodes for a "*Gen 1*" unit, you should choose the (10 gauge) silver electrodes from the drop-down list.

These statements have not been evaluated by the FDA. While we present information suggesting benefits of colloidal/ionic silver, we cannot in any way recommend that you attempt to treat yourself with our devices or solution except under the guidance of a physician, and that you never seek to use silver-based supplements from any manufacturer as anything other than an adjuvant to conventional medical care. We do not seek to diagnose or treat any medical condition, only to provide the highest quality products and silver supplements in a marketplace saturated with solutions and devices spanning the full spectrum of quality, workmanship, and safety. Although we do not want to deter you from using silver-based products and supplements, health and wellness should be approached with a level head and plentiful information. We encourage you to consider the research and articles provided on our web site and to discuss the potential benefits of silver with your physician as an adjuvant to your current health regimen. To ensure that you and your doctor can make the best decisions regarding your health and well-being, we are happy to provide additional information to consumers and healthcare professionals alike.
