

## Why Breathe Silver?

Breathing a silver solution is the fastest and most-direct delivery method into the bloodstream. Breathing - also known as nebulizing - completely bypasses the time involved for absorption through the digestive system and also eliminates the interaction of the silver ions with other contents in the stomach.

Silver ions - when swallowed - form silver *compounds* such as silver chloride. Although silver chloride is not toxic, it is far less-effective at assisting the chemical process of oxidation than the silver ion. Keep in mind that silver *particles* do not form compounds and are suggested (vs. silver ions) in the stomach, digestive system and nasal environment.

Even though a small portion of the silver ions will first find pathogenic agents before finding chloride from stomach acid, the amount of ions that *do* survive are a very low percentage.

Again, particle-rich, highly colloidal solutions are suggested over ionic solutions for the stomach, digestive system and nasal environment (due to their salt-rich nature.) This is why **The SilverLungs Generator** provides protocols for highly ionic and highly colloidal solutions based on your needs for targeting different areas.

When nebulizing, silver ions are suggested over silver particles as the salt (i.e. chloride) content in the lung environment is far less prevalent. Silver ions carry a much greater ability to oxidize pathogenic materials (absent of salt.)

As a general rule of thumb when deciding on the best type of silver to implement, always remember that silver particles (rather than ions) are suggested for salt-rich environments as silver particles do not form compounds with salt.

The medical-grade nebulizer we offer is virtually silent and based on state of the art "*ultrasonic*" technology. Ultrasonic water particulation is the most superior method of generating water particles as small as 1.5 microns in diameter - allowing them to easily reach the smallest areas of the lungs.

*These statements have not been evaluated by the FDA. While we present information suggesting benefits of colloidal/ionic silver, we cannot in any way recommend that you attempt to treat yourself with our devices or solution except under the guidance of a physician, and that you never seek to use silver-based supplements from any manufacturer as anything other than an adjuvant to conventional medical care. We do not seek to diagnose or treat any medical condition, only to provide the highest quality products and silver supplements in a marketplace saturated with solutions and devices spanning the full spectrum of quality, workmanship, and safety. Although we do not want to deter you from using silver-based products and supplements, health and wellness should be approached with a level head and plentiful information. We encourage you to consider the research and articles provided on our web site and to discuss the potential benefits of silver with your physician as an adjuvant to your current health regimen. To ensure that you and your doctor can make the best decisions regarding your health and well-being, we are happy to provide additional information to consumers and healthcare professionals alike.*
