

Why make your own silver solutions?

If you plan to supplement your diet on a regular basis with silver and want the peace of mind that comes with knowing the source and quality of what you are consuming; and you also want to avoid the repeated costs of ordering and shipping a silver solution on-line, then producing your own colloidal/ionic silver is the answer.

If you and your family are supplementing with silver on a regular basis, you will soon realize the convenience of producing your own silver solutions and the cost savings of a one-time investment in a high quality and reliable home generator.

The SilverLungs Generator is a premium product based on years of development and research into dissolving silver into water. **The SilverLungs Generator** is one of the easiest to use and safest colloidal/ionic silver generating products available today. It can produce 1.1 liters of a 10 PPM concentration silver solution in about 3 hours and a 20 PPM concentration in about 4 hours.

The SilverLungs Generator also features a magnetic stirring system, polarity reversal, sealed production chamber, dead-silent operation, multiple concentration settings and an automatic shut-off function.
